FINANCIAL STRESS SUMMARY

 [About Financial Stress Summary](#)

[Back to Top](#)

The Financial Stress Summary Model predicts the likelihood of a firm ceasing business without paying all creditors in full, or reorganization or obtaining relief from creditors under state/federal law over the next 12 months. Scores were calculated using a statistically valid model derived from D&B's extensive data files.

Financial Stress Class: **1**

Low risk of severe financial stress, such as a bankruptcy, over the next 12 months.

Incidence of Financial Stress

Among Businesses with this Class: 1.20% (120 per 10,000)
 Average of Businesses in D&B's Database: 2.60% (260 per 10,000)

Financial Stress National Percentile: 98 (Highest Risk: 1; Lowest Risk: 100)

Financial Stress Score: 1522 (Highest Risk: 1,001; Lowest Risk: 1,875)

The Financial Stress Score of this business is based on the following factors:

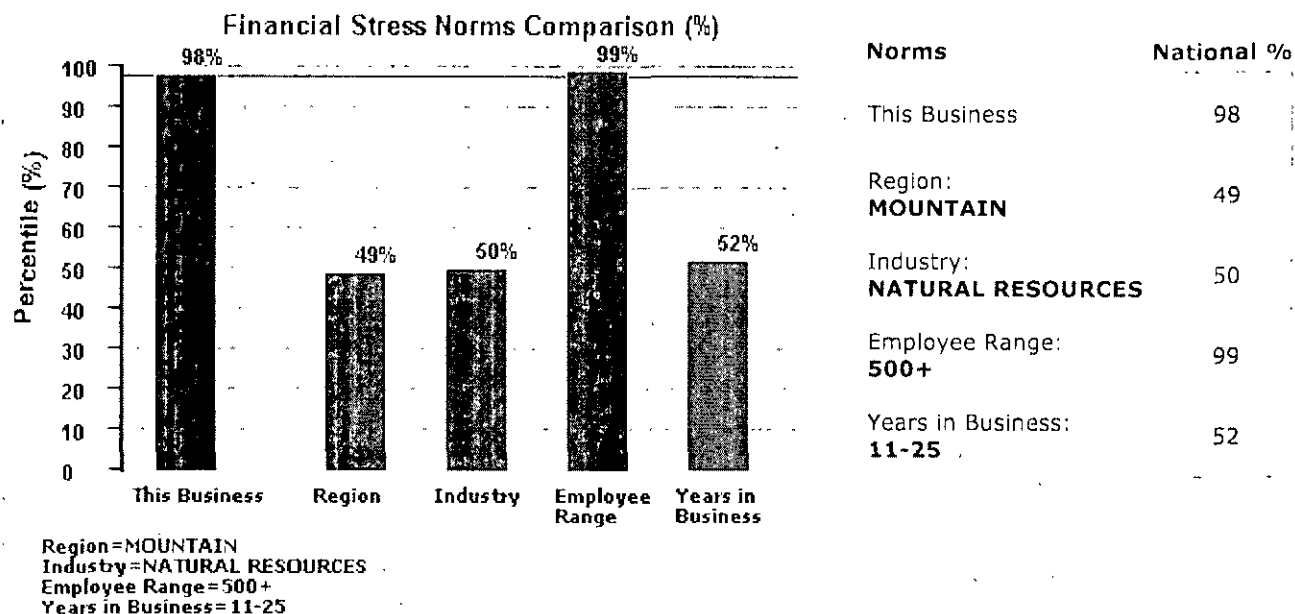

- Control age or date entered in D&B files indicates higher risk.

Notes:

- The Financial Stress Class indicates that this firm shares some of the same business and financial characteristics of other companies with this classification. It does not mean the firm will necessarily experience financial stress.
- The Incidence of Financial Stress shows the percentage of firms in a given Class that discontinued operation

with loss to creditors. The Average Incidence of Financial Stress is based on businesses in D&B's database and is provided for comparative purposes.

- The Financial Stress National Percentile reflects the relative ranking of a company among all scorable companies in D&B's file.
- The Financial Stress Score offers a more precise measure of the level of risk than the Class and Percentile. It is especially helpful to customers using a scorecard approach to determining overall business performance.
- All Financial Stress Class, Percentile, Score and Incidence statistics are based on sample data from 2004.

- The Credit Score offers a more precise measure of the level of risk than the Class and Percentile. It is especially helpful to customers using a scorecard approach to determining overall business performance.
